MOUNT EVEREST LEADERSHIP & WELLNESS CENTER

8400 Feet

THE MOUNT EVEREST LEADERSHIP & WELLNESS CENTER STORY

The Mount Everest Leadership & Wellness Center Story began with the hosting of Give Me This Mount Summit in Kathmandu, Nepal. More than 1,500 leaders attended from throughout Nepal. During the Give Me This Mountain Summit, Dr. James O. Davis, Founder of Global Church Network met a leader from Doru, Nepal. This visionary leader hiked for two weeks through the Himalayas Himalayas Mountains to attend the summit. After its conclusion, he had to hike two weeks to return home. In order to obtain 3 days of training he had to travel around trip for one month, away from his family!

Yet, this Doru leader highlighted a greater problem. If the thousands of villages are going to have a holistic education, in the highest altitudes of the world, then this education will have to take place in the heart of the Himalaya Mountains. Thus, the Mount Everest Leadership & Wellness Center was born!

Since the launch of the MELWC Campaign, numerous steps had to take place over the last three years. When you think carefully about the project: there is nothing easy about building a leadership center to serve the highest altitudes in the world. The name of the nearby airport, Tenzing-Hillary Airport says it all: "The most dangerous airport in the world." Building the MELWC will require incredible teams and materials to be shipped nearly 150 miles through mountains that peak at 14,000 feet before arriving to the construction location.

Doru, Nepal Leader Hiked Two Weeks Each Way

Worshipping at the Mount Everest Leadership & Wellness Center Location

Additionally, there have been multiple land surveying teams and engineers that have traveled to Solukhumbu. The land (1.24 acres) is beautifully positioned, facing north, directly toward Mount Everest. As a result of these teams living in Kathmandu, they have flown numerous roundtrips between MELWC's future location and Kathmandu.

To maximize the use of the land, the MELWC designs, both internal and external, have been updated three times. What began as a single floor design, is now two floors surrounded by gorgeous gardens to accommodate fellowshiping, prayer and networking among the leaders.

With the above steps accomplished, Mr. Kent Jensen, who is an excellent home developer and leader, is serving as the MELWC Lead and is handpicking several construction teams from across the United States, to build the MELWC. These construction teams will decrease the cost and increase the quality of this project.

Mr. Jensen and Dr. Davis traveled to Kathmandu and onto Solukhumbu to the MELWC location in June, 2026. They flew to the Tenzing-Hillary Airport, the most dangerous airport in the world. During their visit they also met with the Nepal's leaders and MELWC engineers.

Mr. Jensen & Dr. Davis meet with Nepal leader

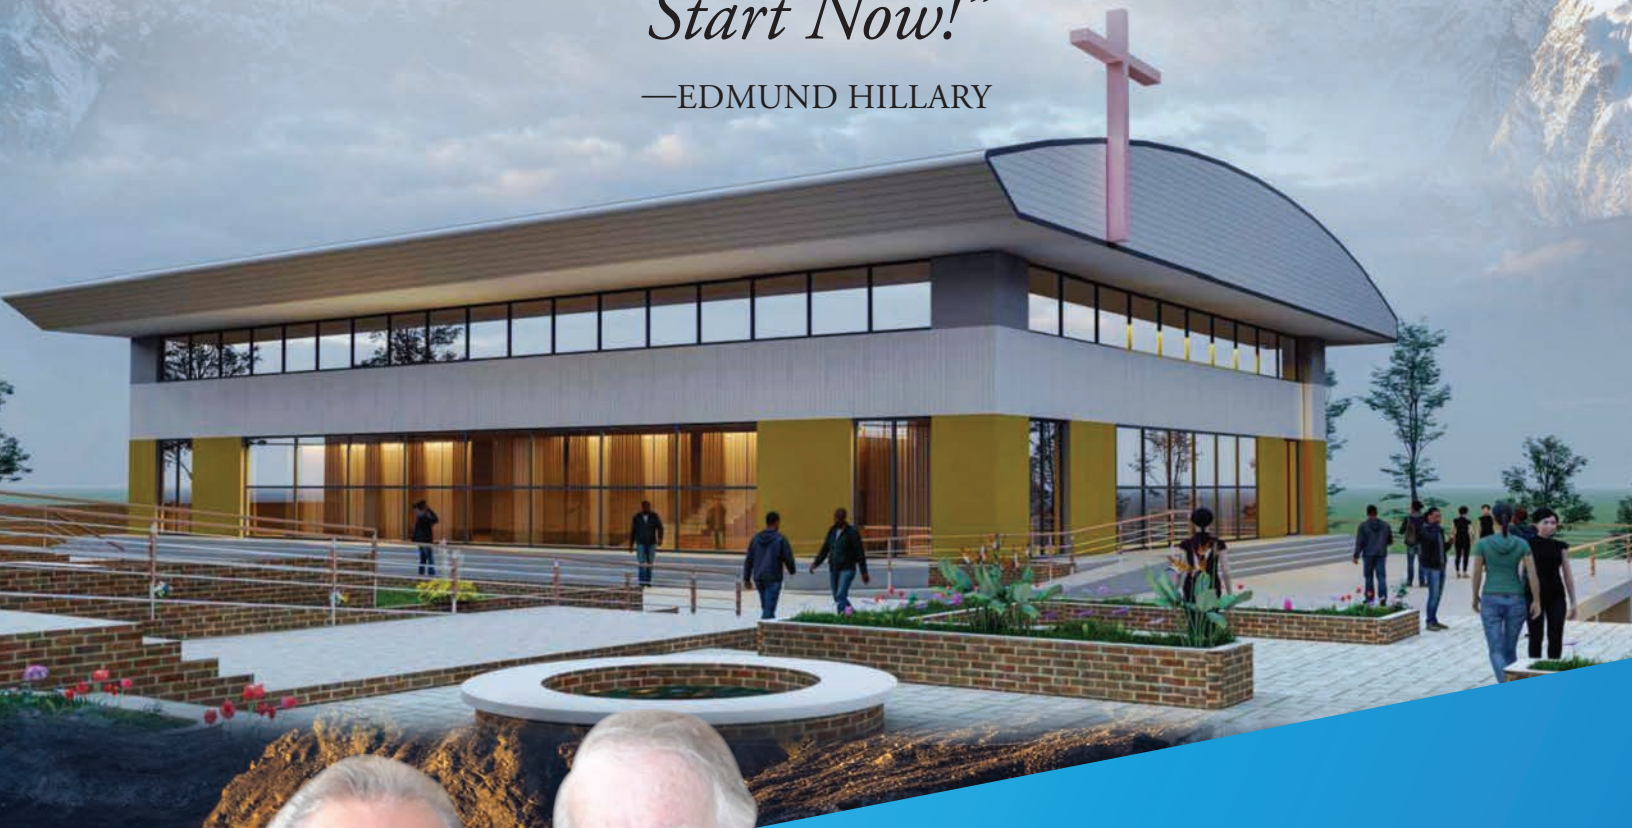

Land Surveyors and Engineers

“When one is choosing a project, if it doesn’t cause fear, then it will become boring and you won’t want to finish. When you have decided what you are going to do, don’t procrastinate.

Start Now!”

—EDMUND HILLARY

“If you only do what others have already done, you will only feel what others have already felt. If you do something that no one has ever done, then you will have a satisfaction that no one has ever felt.”

—EDMUND HILLARY
